Employment

UpGrad   Jun 2015 to Sep 2016
Frontend Engineer · Mumbai

Responsible for the design and development of fast and responsive JavaScript web applications using client-side MVC frameworks such as Backbone.js while utilizing backend REST API. Created the learning platform using Backbone.js, Underscore.js and jQuery with modular, object-oriented JavaScript. The learning platform comprised of various combinations of text, videos , quizzes and discussion forum.

CoreEduTech   Jan 2014 to Jun 2014
Software Engineering Intern · Mumbai

Developed a campus wide social networking site with main focus on group learning. We used MeteorJS framework. It supported basic implementation of - FileShare (upload and download) , CampusTrade (Inter-university e-commerce) , Profile (Student profiles similar to LinkedIn).
